### **DETAILED ACTION**

The amendment filed March 9, 2009, has been received and entered.

Claims 1-64 and 66-68 are cancelled. Claim 69 is new. Claims 65 and 69 are pending and are examined on the merits.

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 65 and 69 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

The following recitations in claim 65 are considered new matter: "represents the percentage of glucose monomers A that bear a X group", "represents the percentage of glucose monomers A that bear a Y group", "represent the percentage of glucose monomers A by the groups Z." Instead of being percentages of glucose monomers A that bear the groups, the specification lists the percentages as percentages of substitution rate of the glucose monomers by the groups X, Y, or Z.

Furthermore, claim 65 now recites that Z is a tyrosine or phenylalanine residue “optionally substituted with Y.” However, the specification does not speak of Z being substituted with Y when defining RGTA 1112 and RGTA 1113 (polymers defined in claim 65).

Finally, when describing the percentages x, y, and z, claim 65 recites that the percentages are “statistically about” their values. However, Table II on page 37 which provides those percentages, does not indicate that they are “statistically about” those values. The recitation “statistically about” results in the claims encompassing percentages outside the percentages listed in Table II.

Because the specification as filed fails to provide clear support for the new claim language, a new matter rejection is clearly proper.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 65 and 69 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 65 is rendered indefinite by the recitation “optionally substituted with Y.” The term “optionally” does not clearly indicate whether there is substitution with Y. The metes and bounds of the claim are unclear because of the term. Claim 65 is also rendered indefinite by the recitation “the percentage of glucose monomers by the groups Z.” It is unclear what is meant by the percentage, and it is confusing that it recites “groups” though only one group, group Z, is recited. Thus, claims 65 and 69 are rejected under 35 U.S.C. 112, second paragraph.

***Response to Arguments***

Applicant's arguments filed March 9, 2009, have been fully considered but they are not persuasive. The applicant refers to the paragraph spanning pages 6 and 7 to provide support that the "percentage of glucose monomers A that bear a" X, Y, or Z group is "statistically about" the specific percentage values shown in Table II of the specification. Though the paragraph speaks of the substitution rates statistically, it is unclear from the paragraph that the substitution rate percentages provided in the specification are "about" their values.

No claims are allowed.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
